

Priya Venkat, PhD

📞 (979) 900 4283 • ✉️ priyav.sub@gmail.com • in priya26

Impact-driven enterprise AI leader with expertise in developing and managing high-performing data science and machine learning teams. Expert in driving strategic initiatives, advocating for innovative ML techniques, and fostering a data-driven culture. Proven track record in leveraging machine learning to influence executive business decisions, improve performance metrics, and enhance team capabilities

Skills

Technology: Agentic AI | LLMs | Evals | Prompting | Transformers | Python | Machine Learning Algorithms | Statistical Inference | NLP | Keras | Hugging Face | Git | AWS | SQL

PROFESSIONAL EXPERIENCE

Senior AI Science Manager - Intuit

Jan 2025-present

- Directed cross-functional teams to design and deploy customer-facing and expert-facing Agentic AI systems in production, driving personalized consumer interactions and generating \$2M in incremental revenue.
- Led initiatives to integrate generative AI with traditional ML models, aimed at delivering measurable business improvements. Spearheaded innovative AI solutions across internal product development teams.

Senior Data Science Manager - Chegg

Apr 2023-Aug 2024

- Directed the revamping of production systems to harness AI by guiding and empowering 3 teams consisting of 16 full-stack ML engineers. This led to a 50x increase in the speed of answering academic questions, which is a core Chegg service.
- Facilitated adoption of best practices for integrating custom-trained as well as commercial LLMs into production workflows by teaming up with Product, Engineering, and Safety to ensure seamless and efficient operations.
- Spearheaded the creation of custom LLMs trained with curated data tailored for educational question answering, driving an 8% improvement in response accuracy.

Data Science Manager - Chegg

Oct 2019 - Mar 2023

- Created long term vision and technical roadmap for Search, Content Tagging, User segmentation verticals by collaborating with Product and Business leaders.
- Led development of churn prediction model that led to a 0.8% lift in retention rate contributing to \$X million annual revenue growth.
- Managed a cohesive team of 8 data scientists and fostered their professional development by introducing continuous learning practices and intra-team mentoring.

Senior Data Scientist - Chegg

Mar 2017 - Sep 2019

- Worked on the end-to-end flow of ML models: clarified project requirements, wrote complex code, set up etl pipelines, trained and tested models, coordinated with stakeholders, delivered actionable results that led to a total impact of \$X million

Education

Texas A&M University

Ph.D in Electrical and Computer Engineering (Genomic Signal Processing)

College Station

2017

Indian Institute of Science

M.Tech in Instrumentation and Applied Physics

Bangalore

2012
